WELCOME

A warm welcome to participants of the 29th Europe in the World programme, an international programme for advanced undergraduate journalism students and young professionals, to take place in Utrecht, the Netherlands and in Aarhus, Denmark from August 2019 - June 2020.

Understanding Europe through reading, writing, travelling and living in two European countries is what Europe in the World is all about. You will also have the opportunity of working in other European countries. This Study Guide provides you with the details, the requirements and an overview. Read it carefully. It is your guide to a successful year.

The Utrecht part concentrates on Europe and the European Union: its politics, culture and identity, social economic structure and relevant policies and legislation. The Utrecht part of the programme provides you with the theoretical framework, contextualized within the journalism profession. In the practical workshop "Reporting Europe" all theory is translated into web based products for the news platform Euroscope, that reflect the broad field of journalism and media.

In Aarhus the focus of the programme changes, the perspective becomes wider: from Europe to the world. The position of Europe in the world will be discussed in various lectures and assignments with focus on foreign policy and euro reporting.

The course gets more practical as it goes on. After the lectures, generally starting in March, there is a travel period. During this period students practice their knowledge and understanding by collecting material in various European countries for the production of the multimedia website and magazine "Euroviews" that finalizes this practical period of European and world affairs.

The programme ends with the main production of this course; the final exam project, which is defended at an official oral exam. Students choose their own theme for the exam project.

The whole programme is offered both on bachelor and on honours level. In this Study Guide the requirements for both levels are explained in detail.

So we welcome you all, the 29th group of participants, and hope you all will have a wonderful and successful year!

Carien J. Touwen

Institute for Media, HU University of Applied Sciences
Utrecht, The Netherlands

Asbjørn Slot Jørgensen

Danish School of Media and Journalism
Aarhus, Denmark

MISSION STATEMENT AND OBJECTIVES

The goal of the Europe in the World programme is to develop the understanding of Europe and the European Union, both on regional and global level, for future journalists and media professionals.

The courses aim to provide grounding in politics, economics and society at the European level with a view to the wider world. The emphasis is on providing: the background knowledge necessary, the tools you must have to become capable journalists and the challenges that allow you to grow personally, intellectually and professionally.

The programme is based on interactive learning, and requires a high degree of commitment and work from the student, both individually and in team settings. Learning takes place in a multicultural framework where you work with students from other countries. During the course we combine text, audio, video and photos on online platforms. Multimedia productions will be part of your work, and tools for this will be taught progressively during the programme. The teaching staff is from the Danish and the Dutch schools of journalism, supplemented by lecturers and journalists from other countries, institutions and media.

Europe in the World is offered on both bachelor and honours level. The bachelor level is the basic level of the programme and should be achieved to successfully complete the programme and acquire the Europe in the World certificate. For some students the programme is the finalisation of their journalism bachelor and with completion they acquire their bachelor diploma, issued by their home institution.

On top of this an honours level can be achieved, which results in an additional honours certificate in European journalism. All courses contain both bachelor and honours competences and requirements. In the final exam, all requirements are integrated.

The competences required for bachelor level follow the Tartu Qualification Profile 2013 published by the European Journalism Training Association (see www.ejta.eu).

1. The competence to reflect on journalism's role in society

Reflect on the societal role of and developments within journalism, specifically in the European context and as a euroreporter.

2. The competence to find relevant issues and angles

Find relevant issues and angles, concerning Europe and the European Union, given the public and production aims of a certain medium or different media

3. The competence to organise journalistic work

Produce a quality work plan based on European topics, relevant content, medium, target group, length and deadline

4. The competence to gather information swiftly

Work in an international context of news gathering and use sources from various cultures in an efficient way through relevant research methods and by contacting oral sources

5. The competence to select the essential information

Select the essential information from your research and literature. Basic understanding of various relevant subject areas concerning European issues is required. Ability to reflect on the information and perspectives, analyse and explain issues in a journalistic manner

6. The competence to present information in an effective journalistic form

Organize journalistic work in a professional way, while planning accurately and communicating effectively with other participants. Structure information in a journalistic manner. Present information based on research in a journalistic product, in several genres, and on different platforms.

7. The competence to account for journalistic work

Reflect on the quality of your work by evaluating own work and the work of fellow students. Reflect on ethical aspects of the work and of the role of journalism in society, and understand the rights and responsibilities of the journalist.

8. The competence to cooperate in a team

Understand the basic requirements needed to cooperate in a team and experience specific editorial settings.

9. The competence to act as an entrepreneurial journalist

Work as a freelance euroreporter, showing ability to produce and publish items in a professional context, understanding the challenges and requirements of working as a journalist in Europe, for local and international platforms

10. The competence to contribute to the renewal of the profession

Define a complex practical/professional situation in the context of Europe and provide workable solutions in the scope of the future of journalism.

Competences for the honours level follow the profile characteristics of the Excellent Professional as defined by the HU University of Applied Sciences, applied for Journalism and Media Studies. Apart from competences the honours level is defined by a higher level of complexity, a broader scope and autonomous professional conduct, in line with the [Dublin Descriptors](#), level 6+ (bachelor with honours).

The honours certificate is issued by the HU University of Applied Sciences.

Reflective Practice/ learning practitioner

- ✓ Shows to systematically understand the discipline and masters skills and methodologies
- ✓ Assesses his own professional conduct critically and systematically adjusts his actions accordingly
- ✓ Acts in a realistic professional context

International Perspective/ global professional

- ✓ Is able to position his professional practice in an international context
- ✓ Takes into account cultural diversity
- ✓ Can make an internationally oriented contribution to the professional development

Leadership Qualities / inspiring leader

- ✓ Can analyse problem situations, generate possible solutions and make decisions.
- ✓ Acts proactively and inspires and stimulates others
- ✓ Reflects on his actions and adjusts his practice accordingly (learning ability). Is aware of his own personal abilities and perceptions.
- ✓ Acts from vision
- ✓ Can work within a team, is able to plan, execute, and delegate.
- ✓ Can communicate effectively within a team and individually, focusing on the successful completion of a task and /or process of cooperation.

Professional Drive / entrepreneur

- ✓ Has a clear vision on the profession and his own professional development
- ✓ Dares to set challenging goals and takes initiative to achieve them.
- ✓ Learns from setbacks, continues to achieve goals and shows creativity in problem solution.
- ✓ Can work purposefully and self-directed. Masters skills such as goal setting, monitoring and process evaluation. Can thus successfully complete tasks within the stipulated time.

Innovation and dissemination/ digital creative

- ✓ Is able to think divergently by developing innovations and convert them into a useful product or service.
- ✓ Recognizes opportunities to implement new innovations.
- ✓ Is able to develop and share products and services for the needs and benefits of society.

STUDY LOAD AND CREDITS

The total study load is based on time spent on lectures combined with an estimated amount of self-study. For each passed course students receive ECTS credits (European Credit Transfer System). For each achieved honours activity or project students receive a star. (For further details about grades, see the section about Study rules and regulations.)

GRADING SYSTEMS – COMPARATIVE TABLE

HU	DMJX	EU	
9.0-10	12	A	Excellent: outstanding performance with only minor errors
8.0-8.9	10	B	Very good: above the average standard but with some errors
7.0-7.9	7	C	Good: generally sound work with a number of notable errors
6.0-6.9	4	D	Satisfactory: fair but with significant shortcomings
5.5-5.9	2	E	Pass, sufficient: performance meets the minimum criteria
5.0-5.4	00	FX	Fail: some more work required before the credit can be awarded
<5.0	-3	F	Fail: considerable further work is required
Academic year = 60 ECTS credits, Semester = 30 ECTS credits, Term = 15 ECTS credits, 1 ECTS credit = 28 hours, NA=not attended, not submitted or incomplete = fail			
Transfer to other grading systems can be found online or by inquiry with the international office of your home institute.			

PROGRAMME POLICY - STANDARDS OF JOURNALISM

We strive to uphold the standards of excellence in education and professionalism. We require the students to uphold the IJF standards of journalism in all their work:

The IFJ Declaration of Principles on the conduct of journalists:

“This international declaration is proclaimed as a standard of professional conduct for journalists engaged in gathering, transmitting, disseminating and commenting on news and information in describing events.

1. Respect for truth and for the right of the public to truth is the first duty of the journalist.
2. In pursuance of this duty, the journalist shall at all times defend the principles of freedom in the honest collection and publication of news, and of the right of fair comment and criticism.
3. The journalist shall report only in accordance with facts of which he/she knows the origin. The journalist shall not suppress essential information or falsify documents.
4. The journalist shall use only fair methods to obtain news, photographs and documents.
5. The journalist shall do the utmost to rectify any published information which is found to be harmfully inaccurate.
6. The journalist shall observe professional secrecy regarding the source of information obtained in confidence.
7. The journalist shall be aware of the danger of discrimination being furthered by the media, and shall do the utmost to avoid facilitating such discrimination based on, among other things, race, sex, sexual orientation, language, religion, political or other opinions, and national or social origins.
8. The journalist shall regard as grave professional offences the following:
 - plagiarism;
 - malicious misrepresentation;
 - calumny, slander, libel, unfounded accusations;
 - acceptance of a bribe in any form in consideration of either publication or suppression.
9. Journalists worthy of the name shall deem it their duty to observe faithfully the principles stated above. Within the general laws of each country the journalist shall recognise in professional matters the jurisdiction of colleagues only, to the exclusion of every kind of interference by governments or others.

(Adopted by the 1954 World Congress of the IFJ. Amended by the 1986 World Congress.)

When submitting your student work, be aware that plagiarism is presenting someone else's words, images or other work as your own without credit or attribution. This includes copying without proper quotation and/or attribution. Automated plagiarism control systems are implemented both in Utrecht and in Aarhus. Be aware that fabrication in the form of deliberate use of bogus information is an act of dishonesty and unprofessionalism.

Violations of the basic rules of journalism and/or exam rules will be brought before the exam board of the institute and can result in failing the course. Severe cases will result in expulsion from the programme. Violation of the rules in honours assignments will result in exclusion from participation on honours level.

RULES AND REGULATIONS

General

1. Students' grades are not merely based on the results of their assignments and exams. Also taken into account are their attendance at lectures and field trips, preparation of the lectures, class participation and professional attitude. Students are expected to attend all classes. If you are unable to attend, you should notify the lecturer(s) in advance.
2. Courses in Utrecht will be graded by the Dutch grading scale. Courses in Aarhus will be graded by the Danish grading scale.
3. The International Office translates national grades to ECTS grades according to the comparative table of grading systems.
4. Grades are published in the relevant intranet systems.
5. In Utrecht, all written assignments have to be submitted both digitally via the Ephorus plagiarism control system and by email. In Aarhus the Urkund plagiarism control system and the Moodle online learning system are used.
6. In Utrecht each student has two chances *per year* to obtain a passing mark, for each course. One regular chance and one rewrite. For both the full grading scale is used, but for rewrites the extra time and feedback is taken into account.
7. In Denmark each student has three chances in total to obtain a passing mark for each course, one regular chance and two rewrites. For the regular chance the full grading scale is used. Rewrites will be marked with either pass (ECTS: E) or fail. Special regulations apply for the exam project.
8. No student who has received a passing mark for an assignment will be permitted to resubmit in order to gain a better result. The first result stands.
9. All subjects have to be graded at least pass (ECTS: E) to graduate.
10. Results will be available within three weeks after the deadline or exam.
11. In Utrecht students will receive a feedback form to explain their grade.
12. Students may request a consult with the lecturer within ten working days after results are available.
13. All lecturers have a number of hours for tutorials in order to assist students with their studies, written assignments, preparation for examinations etc. Students can use these tutorials by making an appointment with the lecturer.

Deadlines

14. Keeping deadlines for set work is part of journalism professionalism, deadlines must be met. If students fail to submit work by a deadline the work will not be accepted and the result will be a fail.
15. Basic requirements for set work (spelling, source list formats, quotation, heading, page numbers a.s.o.) must be held. If not the lecturer is not obliged to correct the work and can grade it with a fail.
16. If a student has requested and has been granted permission for an extension on a deadline, the assignment counts as the first chance and will be graded normally.
17. Permission for an extension within the three week marking period can be given by the lecturer, any further extension can only be given by the programme coordinator.
18. A written request for extension should be submitted at least a day prior to the concerning deadline or exam, together with documents to support your request. In certain circumstances you can only submit afterwards. In such cases, requests have to be submitted within ten days after the deadline or exam and should contain exclusive proof.

Plagiarism

19. Plagiarism is defined as passing off the ideas or words of someone else as though they were your own. It applies equally to the work of other students and to published sources. All work is assessed on the assumption that it is the work of the student: the words, ideas and arguments should be their own. However, much coursework will be based on what students have read and hear. It is therefore important that students show where, and how, their work is indebted to their own sources. Students should list the sources used in a bibliography or reference section at the end of each piece of work or using footnotes.
20. In Utrecht, each assignment can be digitally checked on plagiarism via the 'Ephorus' system. Similar checks will be done in Aarhus via the 'Urkund' system.
21. Plagiarism is a very serious offence. Plagiarism can result in expulsion from the programme.

ACADEMIC CALENDAR UTRECHT

Week	Date	Activities

6	3-7 February	Introduction to the programme, to the Danish School of Media and Journalism and to Danish society and Politics. Start of Euroviews workshop (intro production).
6-11	3 February – 13 March	Classes in Foreign Policy - World Politics
6-13	3 February – 27 March	Euroviews classes (including Euroskills classes, travel preparations). Three days of exam project preparations.
14-16	30 March – 20 April	Euroviews travel period and Easter break (end dates for the Euroviews workshop and for the Exam Project to be confirmed; depending on pending project plans).
17-18	21 April – 1 May	Euroviews production period, and two days of exam project preparations.
19-24	4 May – 12 June	Final exam project – coaching and registration, research and production.
24	12 June	12:00 deadline Exam Project
25	16 June	12:00 deadline honours essay + portfolio 12:00 deadline evaluation survey
26	22 + 23 June 2020	Examination days Honours final assessments and diploma ceremony
26	24 June 2020	Start of summer holiday Start of re-sit period for exam project

PROGRAMME DESCRIPTION UTRECHT

The programme in Utrecht consists of three tracks of 10 EC each. In the first term you will acquire basic knowledge of European Politics, Economics and Law. At the same time you will learn how to produce news items in our newsroom Reporting Europe. Productions are published on an online platform Euroscope and cover all journalistic genres from short blogs to long features. The track Thinking starts with basic tutorials in the first term and gets more intense as we go along. Each track has a fieldtrip (see page 5).

The Knowing track ends after one term with written exams, there is a rewrite a couple of weeks later. The Thinking track is assessed in essays, dossiers and presentations. Deadlines are just before Christmas break. The Doing track also ends just before Christmas, as far as the newsroom and Brussels reporting is concerned. After Christmas Knowing, Thinking and Doing are integrated in a special Euroscope project, productions are part of your Doing assessment. Honours assignments are part of the Thinking and Doing tracks. You can also make your own honours project as part of one of the courses.

On the following pages all courses will be introduced briefly, covering the major aspects such as competences, criteria, assignments, literature. Two week prior to each course the course lecturer will publish a detailed course manual on the Europe in the World page on the institutes intranet Canvas. Each course has its own subpage where students can also find assignments, additional literature and announcements.

Communication between programme coordinator, lecturers and students goes via email and the official course page on the intranet. In addition to this students will set up a Facebook group for everyday communication and invite all lecturers to participate. The Facebook group can be used for last minute announcements and social communication.

UTRECHTVIEWS - INTRODUCTION

The introduction programme in Utrecht starts with a general introduction by the International Office of the university on Monday 2 September, prior to the first course week. This programme includes getting to know the university campus and facilities.

The introduction at the School of Journalism starts on Monday morning 2 September. The introduction continues in the first course week of September with classes for the Knowing and Doing tracks. The Thinking track starts a week later.

The EitW-introduction programme includes getting to know each other, exploring the School of Journalism and facilities, meeting the lecturers but also getting to know the city of Utrecht. You will go out on excursions and write short stories (UtrechtViews) for Reporting Europe.

There are no additional costs for the introduction programme other than regular costs, such as going out for drinks, lunch or supper with the student group.

KNOWING

The 'track' Knowing consists of three major disciplines to understand how the EU works: Politics, Economics and Law. This track provides the body of knowledge you will need as a journalist. This knowledge is not only important for a firm theoretical basis but also to know where to find sources and to understand how 'Brussels' is organized and functions. The courses in this track are all assessed with a written exam and supported by class work, presentations and case discussions. Attending the lectures and participating in class work is compulsory. Be sure to spend time studying the literature during the course, not just because that is a smart way to study, but also because you need the content in the other tracks (Thinking and Doing). The assignments in the Doing-track are linked to the disciplines in the Knowing-track. The focus in the first part is News, the journalistic genre is news items and news stories. The Brussels-fieldtrip is based on your knowledge of Politics, Economics and Law and your understanding of how the EU works.

The courses in the Thinking-track show an integration of disciplines, you will need your 'body of knowledge' to understand how regional development works. That is why Knowing is more intensive in the first part of the programme and Thinking becomes more intensive towards the end.

The total amount of credits for this track is 10 EC. Each course makes up one third of the study load and the final mark. Each part can be rewritten separately.

European Politics

Lecturer	: Arie de Jongh
BA credits	: 4 EC
Type of course	: tutorial, with presentations
Contact	: arie.dejongh@hu.nl

Course content

The course aims to give an introduction into the history and the political structure of the European Union. We will take a look at the evolving of the EU and try to find out what factors were dominant in its History and led to the current structure. The creation and working of the institutions usually were an outcome of the way power was distributed within Europe and they all have the characteristic of compromise. Of course theories that played part in the integration process also will be analyzed and the question will be in how far they were a relevant constituting force.

Apart from the process the workings of the institutions will be a central theme as this reflects the relation between the supranational and intergovernmental forces. Knowledge of the formal relation between the institutions is an important condition for understanding the more informal power struggle that is going in the European Union. As integration is an ongoing process this course will try to pick out current affairs and will place them in a political and historical context. The several policies are discussed in other courses, but we will take a look at the foreign policy of the EU as this is an important field in which the elements of intergovernmentalism are still predominant.

Course relevance

In order to publish on and analyze the European Union it is important journalists are aware of its structure and what are powers determining policies in Brussels. The historical context is necessary to understand the current situation and helps journalists to see patterns in the development of the EU. In our Knowing block European Politics is one of the three constituting elements together with European Economics and European Law.

Learning outcomes

Gather information swiftly, using newsgathering techniques and methods of research(4)

Select the essential information (5)

- Students see and reproduce the main trends of the history of the EU
- Students can identify the major factors determining EU policies
- Students analyze knowledge of the relations between the main institutions of the EU
- Students transfer acquired background knowledge into analysis of the current situation
- The students are competent to translate the more general knowledge into a specific topic on European politics
- Present information in appropriate language and effective form (6)

- Students show their knowledge about the EU , oral as well as written in a presentation and a report
- Student present a broader and more in depth understanding of certain topics related to the course content

Assessment

1. Individual assignment: A written exam on the basis of the literature and the topics discussed in class. The 10 questions will test knowledge and insight on the EU and its institutions (see assessment document for more detail).

2. Group assignment: In depth research and analyses of a specific topic on European Politics, resulting in a written and oral presentation. It needs to be a comprehensive and reliable narrative on the chosen topic.

In order to pass the course both assignments should be graded by at least a pass.

The final grade will consist of adding up both assignments on a 50/50 basis.

Rewrite: In case the group assignment is a fail students will do a rewrite of the written presentation

Course overview

Week	Topics lectures	Presentations

Literature

John McCormick, *European Union Politics*, 2nd edition 2015

specific chapters will be published online at the start of the programme

European Economics

Lecturer : Jeroen Heuts

BA credits : 3 EC

Type of course : tutorial, with practical assignments

Contact : jeroen.heuts@hu.nl

Course content

Today's European Union developed from the European Economic Community, a purely economic set-up establishing a common market between member states. Later on, business interests kept playing a prominent role in driving the development of the European Union forward. Economics still is at the heart of much what is happening in Brussels. It comprehends agricultural policy (CAP), cohesion and structural policy, the internal or common market, social policy and employment, industrial policy and innovation, financial and monetary policy (ECB), both within the EU as – since 2001 – the EMU or Eurozone

Course relevance

Many current developments regarding the EU can only be understood fully with sufficient knowledge of the economic context. To be able to write about European subjects, journalists should have a clear understanding of economic fields, policies and developments, and their impact upon the citizens of Europe. This information is needed to be well prepared for the Brussels trip, and also to have sound knowledge for the journalistic articles to be written for some other subjects of this course

During each lecture the teacher will provide some propositions on current economic policy, inviting the students to consider, formulate and defend their opinion on these statements.

Learning outcomes

- The student correctly interprets current (newspaper) articles on the EU economy (Tartu 2)
- The student shows sufficient grasp of European economic and financial themes, problems and debates to report about them (4)
- The student demonstrates basic knowledge of long term (macro) economic trends and developments in the EU (4)
- The student distinguishes the economic, social, financial, technological and political aspects of European issues and themes (6)
- The student selects relevant journalistic articles on current EU issues from quality papers, summarizes these articles, linking them to the theoretical subject matter (4)
- The student actively and confidently participates in economic discussions about the E(M)U and formulates arguments and statements pro and con current EU and euro zone economic (and financial) policy (1)
- The student convincingly motivates and justifies his/her personal opinion on European social economic issues and policy options (2)

Assessment

The students are expected to participate actively and to prepare themselves thoroughly by reading the subject matter before the lectures. Their knowledge and understanding of the subject matter in the course literature will be tested in a written exam, consisting of 20 open questions.

Students can previously earn an exemption for 4 questions at choice (=20 points) by turning in an assignment each week, consisting of 5 profound and intricate questions (no reproductive or definition questions) about the relevant chapter in the textbook, and a current qualified and relevant news article (e.g. from *The Economist* or a EU oriented paper) about the subject matter of the week, to be both summarized and linked to the textbook. Obviously the quality of both questions and summary has to be at bachelor standard in order to be accepted.

The rewrite of the exam will consist of a similar test (20 new questions), the exemption can be used again

Literature

John McCormick, *European Union Politics*, 2nd edition 2015, Chapter 5, 6, 7, 19, 20, 21, 22, 25 (only the economic, social and financial aspects in each chapter). The lecturer will provide additional digital material, consisting of current articles and fragments

Course overview

Week	Topics in the lectures
36	From EEC to EU, chapter 5 and 6
37	Euro crisis and beyond, chapter 7
38	Economic policy, chapter 19
39	Euro Zone and ECB, chapter 20
40	Cohesion Policy, chapter 21
41	Managing resources (CAP etc), chapter 22
42	The EU and the World (Trade), chapter 25
43	Study Week
44	Exam Week

European Law

Lecturer : Merijn Maassen
BA credits : 3 EC
Type of course : tutorial with practical assignments
Contact : merijn.maassen@hu.nl

Course content

The countries of Europe are to a considerable extent guided and restricted by European law. The same holds true for the citizens and companies of Europe. But for the latter, there is another, possibly more important side of the coin: 'Europe' also protects them and gives them rights.

It is a well-known fact that the European Union produces a lot of rules, and obviously, we are not going to cover this entire body of law. Instead, we focus on a few important areas.

Less well known than the EU, is the European system of human rights that is established by the Council of Europe, the European Convention on Human Rights and the European Court of Human Rights. However, this convention and court protect the basic rights of some 800 million Europeans from 47 different countries. Fairly recently, in 2009, human rights also have been incorporated in the legal system of the European Union, when the EU's Charter of Human Rights entered into force. Before that, the European Union had from early on protected certain basic rights of an economic nature. Human rights is, therefore, one of the topics the course will focus on.

Other topics will be:

- The general system of European Union law;
- The importance of the Court of Justice of the European Union;
- The results EU law has produced for citizens and companies, for instance for workers and professionals, students, migrants and consumers.

Course relevance

Since laws are an important instrument of the EU to achieve policy goals, a journalist that publishes about the EU needs to understand both the general system and at least a number of specific effects that EU law has in society.

Human rights play an ever more important role, both close to home and in international politics. The European Convention on Human Rights is widely regarded as the most effective international human rights regime in the world. Debates about human rights, however, can touch on issues of cultural identity and national sovereignty. As a consequence, the successful European human rights system has caused some friction within individual member states of the Council of Europe and the EU, which make European human rights a fine example of the ever-present debate 'do we need more or less Europe?'

Students can also use the knowledge they acquired in this course when they publish about subjects related to EU law or European human rights in Reporting Europe.

Learning outcomes

- Students remember and identify the basic principles of European human rights law and European Union law (Competences: several named under 4).
- Students show understanding of the role and importance of the European courts (the European Court of Justice and the European Court of Human Rights) (under 4).
- Students recognize, analyze and interpret news and current affairs concerning EU law and European human rights law (for instance court cases, political dealings between member states and / or European institutions). (Competences: under 2, 5)
- Students find the appropriate sources for information and research concerning EU law and European human rights law (4)
- Students analyze individual or political issues that are related to European law and explain the juridical question(s) that are debated (under 5, 6, 7)
- Students explain legal matters in clear, simple language, avoiding jargon. In their presentation, they make an (abstract and usually complicated) legal question understandable and interesting for a general audience. At the same time, they avoid possible legal pitfalls and do not oversimplify (6).

- Students see and explain what is at stake for the parties in the legal conflict, and also the wider impact for European citizens, companies, and EU / Council of Europe member states in general (6 and 7).
- Students read a legal text and understand and explain its essence (5 and 6).

Assessment

1. Students will do a written exam on the basis of the studied literature and the discussed content in class (individual assignment).
2. Students will present an important European court case in class (assignment in small groups). Other students will be assigned to ask questions about this court ruling.

Rewrite: The exam can be rewritten twice within the time span of the Utrecht part. The presentation will be substituted by extra questions on the written exam.

Literature

(will be available in August)

Course overview

Week	Topics lectures
36	Introduction to EU law
37	Principles of EU Law
38	Internal market I: free movement
39	Internal market II: specific areas
40	Introduction to Human Rights
41	Human Rights I
42	Human Rights II
43	Study Week
44	Exam Week

THINKING

The courses in the Thinking-track emphasize on journalism research and multidisciplinary content. They show an integration of disciplines, you will need your 'body of knowledge' from the Knowing track to understand how regional development works or to see the impact of identity on political and societal choices. That is why Knowing is more intensive in the first part of the programme and Thinking becomes more intensive towards the end. The core elements of the Thinking-track are critical/ethical thinking, research and analytical skills. The course Sustainable Regional Development integrates content from economics, politics, law, environmental sciences and geography in the context of a region's development. The course Culture and Identity triggers you to think out-side-the box and looks at European culture and identity from a philosophical, psychological and social sciences angle, within the context of art (film).

These courses require in-depth research and structured planning. Training in journalism research is part of the SRD course. This serves journalistic genres such as features, background articles and analyses. You will need these skills in the Danish part of the programme for the preparation of your reporting trips and your big productions in Euroviews and for your final exam project.

The total amount of credits for this track is 10 EC. Sustainable Regional Development makes up 60% of the study load, including the fieldtrip to Rotterdam and a short fieldtrip for your project (region of choice close to Utrecht). Culture and Identity makes up 40%. The final mark is calculated accordingly. Both parts can be rewritten separately (see course descriptions).

Sustainable Development in European Regions

Lecturer(s) : Marcel Bayer and Carien Touwen
 BA Credits : 6 ECTS, including fieldtrip to Rotterdam
 Type of course : tutorial, research training
 Contact : carien.touwen@hu.nl;
marcel.bayer@hu.nl;

Course content

Demographical and social change are connected with economic developments. Unequal economic development is mirrored in housing- and environmental problems, ethnic conflicts and social marginalisation. For those reasons it is interesting to study regional development and the effect of regional economic policy. Especially since European regions with the Lisbon Agenda and cultural programmes more than ever are competitors in the 'battle' for investors, visitors, attention.

During this course we analyse factors that contribute to regional economic development and we will study mainstreams in scientific research and thinking on this subject. We compare perspectives in several European regions and pay attention to regional economic policy on regional, national and European scale.

Sustainability and Liveability are major topics in our societies since the first UN Earth Summit in Rio de Janeiro in 1992. Since then these policy-areas have more priority at local, regional, national and European government-level. The European Commission formulates Sustainability as one of the three policy-pillars (besides Smart and Inclusive). It's an integral part of its regional and environmental policy, so the EU stimulates European regions to integrate these topics in its programmes and projects. The trending focus of development is to make regions sustainable and 'climate proof'. As example we will visit Rotterdam.

Course relevance

The world becomes increasingly global and regional/local at the same time. This in itself is an interesting development for journalists to analyse. Regional storytelling is becoming the major aspect of the work of Euro reporters. In this course we will focus on the way sustainability and innovation is shaped in a regional context, effecting the local economy and its people.

Learning outcomes

Gather information swiftly, using newsgathering techniques and methods of research (4)

Select the essential information (5)

- Students understand the history and importance of economic regional and urban development in the European context

- Students understand the development and importance of environmental and climate policy and regulation in the European context
- Students recognize the regional economic dynamics in the European regions and can mention relevant factors behind it
- Students are able to analyse regional, European and global ideas and discourses on environment, climate change and sustainability
- Students are familiar with and can use efficient research strategies and tools.
- Students know where to find reliable sources on economic and sustainable urban performance of European regions

Find relevant issues and angles, given the public and production aims of a certain medium or different media (2)

- Students are able to translate acquired information on sustainable and economic development in European regions in useful journalist subjects
- Students have the knowledge of current events and are able to assess if a subject is both interesting and newsworthy enough for an specific audience

Organise and plan journalistic work (3)

- Students are able to make a realistic work plan and keep to deadlines
- Students show flexibility and creativity when changes to the plan are required

Cooperate in a team or an editorial setting (8)

- Students show social skills, dedication and initiative as part of a research team

Reflect on the societal role of and developments within journalism (1)

- Student have insight in the role and influence of journalism in modern European society, especially in relation to topics such as development and sustainability

Assessment

Group assignment for a research team of 2 students: Produce a research portfolio on sustainable development of a region of your choice in Europe. Relevant list of sources is required. You may design your research portfolio in a format of your choice, print-based or web-based. Give a presentation of your region on the basis of your research.

Detailed requirements can be found in the study manual on the course page at the start of the programme in September.

The research portfolios can be input for Euroscope newsroom in January, which will focus on fact checking the European issues and politics (see honours, page18)

Rewrite: Deadline for the rewrite is before leaving for Denmark in January.

Chapters 10 and 16 on Regional Policy and Environment

Course overview (more detail on course page on Canvas at the start of the programme)

Fieldtrip Rotterdam

As part of the course Sustainable Regional Development we will visit Rotterdam. Rotterdam is an international harbour city with a strong emphasis on innovative development, creative industry, sustainability and climate change

(<http://www.rotterdamclimateinitiative.nl/en>).

Cost will be around 25-30 euros for transport from Utrecht to Rotterdam by train, and local transport in Rotterdam (bus, ferry)

An assignment will be part of the excursion.

European Culture & Identity

Lecturers : Brian Maston and Carien Touwen
 BA Credits : 4 ECTS
 Type of course : tutorial, workshops
 Contact : carien.touwen@hu.nl; brian.maston@hu.nl;

Course content

The course is based on didactical theory of experiential learning. The starting point is a European film, which is shown at the institute (in the evening). Each film revolves around a different topic in continental philosophy and cultural/social theory. The course highlights different aspects of European identity and discusses contemporary issues.

This course is about the role of 'big ideas' in shaping notions of European identity. 'Isms' including liberalism, Marxism, fascism, post-modernism, multiculturalism, globalism, nationalism, feminism, and orientalism have all contributed to the formation of European world-views. The representation of these ideas in contemporary European film is the starting point of our search and analyses. Theory on representation and construction will serve to identify ideologies in film and to analyse their function in culture and identity.

The various and often related ideologies will be discussed in class, based on close watching of the film and group based workshops (on the principle of 'flipping the classroom').

The class and individual work is supported by relevant literature, which is added to the body of knowledge co-created by students and lecturers.

Course relevance

The course provides an essential reference to the most relevant and influential tenets of European thought. Notions of a just society, the relationship between an individual and the state, and the relations between social classes, have played a tremendous role in shaping world events way beyond Europe's borders. In addition, these big ideas provide a framework for understanding the socio-cultural fabric of European life. They are, in short, necessary, foundational material for journalists working internationally in Europe and elsewhere.

Learning outcomes

Gather information swiftly, using newsgathering techniques and methods of research (4) and Select the essential information (5)

- The student interprets and places in a historical framework important political, social, economic and cultural developments relating to European identity;
- The student can demonstrate a good general knowledge and societal insight in economic theories, political ideologies and socio-cultural issues;

Find relevant issues and angles, given the public and production aims of a certain medium or different media (2) and Organise and plan journalistic work (3)

- The student can use relevant, authoritative sources on European cultural identity in the production of his work;
- The student can translate theoretical concepts of European cultural identity to a journalistic context and find relevant angles to address a European audience

Cooperate in a team or an editorial setting (8)

- Students show social skills, dedication and initiative as part of a research team

Assessment

* Workshop developed and carried out by a team of three to four students. The workshop is based on research and has interactive elements. The group will also write an analytical essay.

* Blog posts on the course blog site. Each student posts at least two blogs and reacts to at least two other blogs. Blogs are related to the films and discuss relevant issues in a professional and academic way. Both parts (group portfolio and individual blogs) need to be at least a pass and make up an equal part of the final grade.

Rewrite: Incomplete portfolios and individual essays can be rewritten (see regulations of this programme). Deadline for the rewrite is in January before departure to Denmark.

Course overview (more detail on course page on Canvas at the start of the programme)

Reporting Europe

Lecturer(s) : Bram Peeters and Elvira van Noort
 BA Credits : 10 ECTS
 Type of course : workshop /newsroom
 Contact : bram.peeters@hu.nl / elvira.vannoort@hu.nl

Course relevance

Reporting Europe is the practical component of the EitW programme in Utrecht. This course works as a newsroom; students select news issues from the European policy areas and produce news stories on a website.

This is easier said than done, as the EU is widely regarded by the public as boring, bureaucratic and complicated. People's confidence in the EU has dropped to record lows in most member states. The EU is under attack, one can say. Is it up to reporters to defend the construction of the European Union, and the decisions made by its institutions? Certainly not. However, it's the obligation of the media to inform the public. And to do so, reporters should have an understanding of the working of the main European organisations and institutions.

How to 'sell' Europe to your reader is therefore the key question in this course. How can you 'seduce' your reader to take an interest in European affairs? What do you need to know as a journalist about the EU in order to offer quality reporting? Where can you find the right information in order to write stories that will actually be read because they are interesting? These challenges will be faced in the newsroom of Reporting Europe.

Course content

Reporting Europe teaches students to debate, find, interpret, process and publish European news. We will start the course with publishing about the themes that are addressed in the other courses. We will practice researching for information and human sources, brainstorm about the content which will consist of news articles as well as background stories based on the Brussels trip and research related to the Sustainable Development course.

The group will meet twice every week with the lecturers, and continue during the week as a newsroom. The week starts with news selection and discussion about the news angle. When stories have been assigned and the news team has decided on the type of stories, students start production during that week. Production is discussed in class the week after, and students will read and comment on an assigned article of a classmate in the week after it has been published. Articles will also be assessed by the lecturers.

The first part of Reporting Europe pivots around News, resulting in news items and stories. The major event is the Brussels fieldtrip, this also concludes the first part of Reporting Europe (for more info on the trip see 'Excursions and Fieldtrips').

In the second part, after the Christmas break, the Doing-track is finalized with fact-checking European issues and politics. The productions include fact checks and analyses (see honours).

During the whole Reporting Europe course, everybody will regularly contribute to the website's social media. Besides our journalistic production concerning 'Europe', we will also focus on practical topics like freelance journalism.

Learning outcomes

Bachelor level

- Students will know how to find news and background stories regarding Europe. They recognize news connected to Europe which is fit to print or to publish otherwise. (Tartu 2)
- Students are able to research Europe-related topics creatively and thoroughly. They find the relevant people, organisations and data bases. (3,4,5)
- Students can analyse European current affairs and background developments and find news angles and interesting approaches to / basic statements about these developments. (competence 2,3,4)

- Students can produce articles on EU developments and publish them on a website. (5,6,8,9)
- Students are able to explain European topics to a general, not-specialized audience. (2,5,6)
- Students know how to write in an attractive manner about European current affairs. (2,5,6)
- Student can work in teams and will also know how to evaluate each other's work constructively. (7, 8)
- Students will have an idea how to approach media and sell story ideas or articles as a freelancer. (9)

Assessments – newsroom productions

The articles will be assessed as 'fail-pass-good'. When deadlines are missed, the articles will be marked as a 'fail'. The assessments of the articles as well as the professional behaviour will be part of a portfolio that will be marked at the end of the course.

Rewrite

Only the Brussels assignment and the final production can be rewritten when marked as a 'fail'. When too many articles were marked as 'fail', resulting in a final grade lower than 5.5 or if the general input/attitude is seen as insufficient, an extra assignment (news analysis of 1500 words on a current EU related topic) will be the consequence.

Course overview

See general schedule on page 9 and detailed schedule on the course page

Suggested literature

Mike Gandon, (edited by Heather Purdey), *English for International Journalists*, 2013 – Routledge

Fieldtrip Brussels

In the second term we will spend a week in Brussels. Visits to the European Parliament and the European Commission aims to illustrate how Economics, Politics and Law work in every day practice. We will also focus on subjects in the Thinking track (Regional Development, Sustainability and Culture). In three days you will meet a number of speakers who will tell you about Europe from different points of view, covering different topics. The second part of the week you will work on your own stories and do research, speak to sources and collect material.

The 'school' makes arrangements for accommodation for the first three days and will inform you in time about costs and deposits. You have to arrange your own accommodation for the remainder of the week, and must also arrange your own transport.

The exact programme will be available mid-October.

Approximate costs for the field trip:

Hostel : 35 euro per night, including breakfast

Meals : own choice

Trip : 55/60 euro return train ticket or 25/30 Euro return bus ticket with Eurolines

Travel : 10-20 euro within Brussels

You will not need a visa for Belgium, as Belgium is a Schengen-country, but you have to bring your passport or ID-card.

Honours in Europe in the World

The way Honours works will be explained in the first honours meeting in the introduction week. Students participating in honours will have meetings in which we will discuss progress of honours assignments and work on special initiatives. Honours at the HU Applied Sciences Universities aims to challenge students and support them to develop extra-curricular competencies such as leadership, innovation and entrepreneurship (see page 4).

The course subjects in Knowing and Thinking are at the basis of getting to know and understand the complex sources of data on the European Union, its institutions and politicians. Building databases and collecting relevant information are valuable skills and input, in order to quickly fact-check statements/claims and analyse fake news on specific European topics. An extra challenge lies in understanding the flows of money in the European Union, and what is really true about how money is spend!

After your Brussels fieldtrip and productions the Reporting Europe newsroom will transform into a Euroscope fact-check team. The last two weeks before Christmas break will be preparation, after Christmas you will work on fact-checks, blogs and other journalism productions involving European institutions and issues. And you will analyse reliability of information and data on Europe. As this is an honours programme, it is also up to you to decide what to report on and how to work. It could involve simple false claims or wrong data to more complicated 'follow the money' or debunking fake news.

Apart from these course related honours options, there is always the possibility to do your own honours activities. In the HU honours programme, there is a lot of room for initiatives. And Europe in the World offers several opportunities to take this. For instance, organising workshops or fieldtrips, inviting guest lecturers, getting your article published or starting your own project. The newsrooms (Euroscope and Euroviews) offer opportunities to work on special journalism skills, such as editing, design and social media.

Doing your own Honours

Working in a newsroom requires more than just participating, meeting the requirements for journalism productions and uploading your articles to the web. Students are offered the opportunity to work on special skills and competences on honours level.

In the full-time multimedia newsroom all students can show professional drive by setting higher goals than acquired, show creativity in problem solution, work under pressure and still perform above average.

The multimedia newsroom is a new part of the first semester and therefore there is a lot of room for own initiative and suggestions especially for the honours level. In addition students who sell news articles can achieve a star for Reflective practitioner.

Learning outcomes Honours level

Reflective practitioner, entrepreneur

- The student assesses his own professional conduct critically and systematically adjusts his actions and production in order to sell and publish productions on an acknowledged platform
- The student acts in a realistic professional context

Leadership skills

- The student acts proactively and inspires and stimulates others, takes the lead in decision making
- The student is aware of his own personal abilities and perceptions in relation to the group process.
- The student can work within a team, is able to plan, instruct, execute, and delegate.
- The student communicates effectively and focuses on the successful completion of the production.

Professional drive

- The student has a clear vision on the multimedia journalism and is able to translate this into a realistic product
- The student dares to set challenging goals and takes initiative to achieve them.
- The student learns from setbacks and shows creativity in problem solution.

- The student can work purposefully and self-directed. He/she can successfully complete tasks within the time constraints of full-time three-day multimedia newsroom.

Innovation and dissemination

- The student is able to think divergently by developing innovations and convert them into a useful product for the multimedia website
- The student recognizes opportunities to innovate the production platform and can implement them or instruct others to do so.

PROGRAMME DESCRIPTION AARHUS

INTRODUCTION and Euroviews/Euroskills components

Credits : 10 ECTS

Introduction

Lecturers : Inger Munk, Asbjørn Slot Jørgensen and guest lecturers

Contact : imu@dmjx.dk

The aim of this course is to give an introduction to the Aarhus programme, the Danish School of Media and Journalism and its facilities, and a general introduction to your new town and country; Aarhus and Denmark. Introduction to Danish Politics and the Danish media scene, as well as city tours, are parts of the introduction with the objective to give an insight into different aspects of the Danish Society. Fellow students will contribute, and the intro programme will be linked to exercises and smaller productions.

Mini-workshops: Sound, photo, video

Lecturers : Hans B. Nørgaard, Søren Pagter, Annegrete Skovbjerg, and others

Students learn basics of techniques of: photo, video, sound, magazine design, online publishing, social media profiling, and more - to be used in the preparation and production of the different assignments and the Exam Project.

These and other workshops are offered according to the needs and priorities of the EITW class and teachers. Students are invited to engage in organizing these workshops, nicknamed 'Euroskills'.

FOREIGN POLICY – World Politics

Lecturers : Roger Buch, Asbjørn Jørgensen, Lasse Nørgaard, and guest lecturers

BA Credits : 10 ECTS

Type of course : lectures/tutorials and practical assignments

Contact : asbo@dmjx.dk or imu@dmjx.dk

Course content

This course introduces students to the theories and methods of international relations, and the major approaches currently used.

From studying the foreign policies of the world's major players, the course will focus on how foreign policy is made - and how it has changed.

Starting from definitions of foreign policy, globalization and the world agenda, the course moves on to the foreign policy of powers like the US, United Kingdom, Germany, China - still linked to current affairs and the role of Europe.

There are 10 predefined lectures, with preparation for each lecture in the form of literature and assignments. Additional lectures will be added about current issues.

Course relevance

This course aims to introduce the theories of international relations and foreign policy analysis, and the studies of foreign policy of major powers. The current position and interests of these powers are analyzed through current events, seen through the necessary cultural and historical background.

While the courses in Utrecht concentrate on Europe and the European Union, this course positions Europe and its countries in the World, discussed in various lectures and assignments with a focus on foreign policy.

The lectures on foreign policy are followed by lectures to prepare the Euroviews themes.

Learning outcomes

- Have the ability to analyse international events in a systematic fashion.
- Manage the tools and methods for transforming this analysis into a written piece of foreign policy analysis.
- Achieve deeper understanding of how foreign policy and international relations are conducted.

- Obtain awareness of national identities, international understandings, and national-global debates - and the role of the media in establishing or changing these identities, understandings and debates.
- Know the characteristics of the foreign policies of the world's major powers.
- Understand the concepts of globalization, and how globalization is affecting foreign policy.

Assessment

Each student will turn in three articles, do two class presentations, and submit a number of hand-ins. Class attendance is required.

Honours level:

- Stars can be awarded for taking on extra tasks or arranging activities related to the course.
- Honours students will produce an additional assignment in the form of an essay or foreign policy analysis, details to be agreed with the responsible teacher.
- Students are encouraged to propose or engage in extra-curricular activities, and include these in their honours portfolio.

Literature

A reader will be made available to the students by the start of the semester in Aarhus. Additional current examples and handouts will be distributed in class or online.

EUROVIEWS

Lecturers : Asbjørn Slot Jørgensen, and guest lecturers
 BA Credits : 10 ECTS (including Introduction and Euroskills)
 Type of course : workshop with theory and a number of lectures; newsroom. Study Tour and travel assignment.
 Contact: : asbo@dmjx.dk

Course content

The Euroviews course comprises a number of workshops, lectures, tutorials, and presentations, linked together by exercises and assignments. It starts in the intro workshop with the introduction of different themes, media issues, and journalistic assignments. It overlaps and interacts with the World Politics course. And it concludes in the production of a common magazine (of which you will find earlier editions on euroviews.eu.)

As such, the Euroviews course contains the main practical components of the semester in Aarhus, and includes a period of travel and reporting in a European country.

The course introduces patterns of modern media consumption, including test/analysis of audience. Ethics and professional conduct are discussed, along with concrete guidance for the international reporting.

A study visit with other international students to Copenhagen is expected in February. EITW students will have the option of working with other DMJX classes on specific assignments and projects, including extra-curricular activities organised by students.

Course relevance

The EitW year aims at preparing students for a career in journalism; hence the practical approach with a focus on applicable tools, and on ways to navigate the media market with classical journalism or new products and business models. Working in changing team settings is an important feature of the course, while also having to complete individual tasks.

The series of content based courses in Utrecht and Aarhus, as well as the different components in the first part of the Euroviews course, provide a solid foundation for the students' individual travel period. And the Euroviews magazine and website contribute to the students' portfolios. Meanwhile, Euroviews is also a lab; the students are highly encouraged to test themselves and to experiment with tools and methods before the exam project. The workshop also serves to providing the necessary components for the students' Final Exam Project.

Learning outcomes

- Students will know basic principles of journalistic entrepreneurship, and the main challenges in developing business plans and freelancing models.
- Students will know different European journalism traditions and codes of conduct, and understand the concepts of stereotypes.
- Students learn ways to integrate different types of media, and produce photos, video, text to tell a story with a variety of tools.
- Students gain basic knowledge and tools to produce online and/or print magazines.
- Students gain methods to manage resources and time individually and in a newsroom setting.
- Students gain experience in the team based creation of a common coherent product.
- Students understand reading patterns for online stories and websites, as well as ways to measure audience behaviour.
- Students understand ways to engage with the audience through dialogue and social media tools.
- Students will know how to develop story ideas for international reporting and prepare with background research, problem analyses and story synopses.
- Students can transform complex problems and concepts into journalistic stories, and show causes and consequences on a very concrete level.
- Students can plan an international reporting assignment, including scheduling appointments and conducting research.
- Students will know ways to track sources, develop alternative stories and find relevant case stories in foreign environments.

AssessmentBachelors level:

- Submission of journalistic multimedia stories; produce research plans, synopses, story pitches; produce reflection reports and source lists to supplement the stories.
- Presentations in class. Contribution in the required group work. Completion of necessary newsroom tasks beyond compiling own stories.
- Analyses of productions, and of different media products and other material. Active participation in the course's workshops. Successful completion of the practical exercises.

Honours level:

- Leadership, Innovation, Professional Drive follow similar criteria as for the Reporting Europe course in Utrecht.
- Stars can be awarded for taking on extra tasks or arrange activities related to the course.
- Students are encouraged to propose or engage in extra-curricular activities, and include these in their honours portfolio.
- A high level of complexity in selected topics can qualify for stars.

Additional information:The travel period:

The students prepare for the travel period individually, group wise and in the class, supervised by the responsible teacher. The travel is independently financed by the students, who may look for individual sponsors.

Literature:

1. Readers, articles and tip sheets related to the workshops.
2. Manuals for all technical components.

All literature will be made available as photocopies, booklets or via the online course pages.

FINAL EXAM PROJECT

Assessors	: lecturers from Utrecht and Aarhus, assisted by external professionals (external examiners)
BA Credits	: 10 ECTS
Honours level	: certificate of excellence/honours certificate
Assessment	: Production of final exam project, including journalistic productions, reflection report and oral exam
Contact/coordinator	: Asbjørn Slot Jørgensen, asbo@dmjx.dk

Objective

Bachelor level

The final exam project consists of journalistic product(s), a reflection report, and lists of sources and literature.

In the exam project the student shows to have acquired the skills and knowledge of the EitW programme in a coherent manner and masters them at the end level (bachelor) of the programme, and thus meets the Tartu competences for journalism professionals.

The exam project must reflect development of the idea, knowledge about society and the role of the media, analytical skills, research skills, ability to communicate, considerations about target groups as well as the ability to organise time and information. For Dutch and Danish students, the exam project is also the finalization of their bachelor programme.

Evaluation Criteria

The evaluation of the final exam project focuses on three main areas:

- research & analysis,
- production & presentation of material, and
- professionalism & reflection.

The numbers in parenthesis reflect the Tartu competences for journalism professionals.

Research & Analysis:

(Tartu 2,3,4,5)

- Insight in society/Europe, use of information from the EitW courses.
- Development of an idea, logical choice of angle, consistency in project.
- Analytical skills; analysis of the problem; and contextualization.
- Research skills, variety and relevance of sources.
- Planning skills, swiftly gathering information, adjustments of plans.
- Documentation, reliability, balance.

Production & presentation of material:

(Tartu 1,2,4,5,6)

- Ability to communicate; clarity, possible identification and fascination.
- Knowledge of target group shown in use of language, complexity level, background info provided.
- Selection of information, connection of elements, use of quotes and arguments.
- Content ready for publication, set in a realistic/professional context.
- Presentation of sources, proper referencing, credits.
- Well used story structure, adequate structure in relation to genre and medium. Adequate use of narrative techniques (interview, features, human interest).

Professionalism & Reflection:

(Tartu 1,7,8,9,10)

- Understanding of relevance of the chosen topic, in all dimensions.
- Reflections on other media coverage of the topic.
- Considerations about target group, related to language, complexity, background info.
- Assessment of sources; credibility, relevance, bias, value.
- Ethical considerations, grounded on professional standards and relevant law.
- Use of professional terminology. Reflection on learning and content from the EitW year.

- Insight in own process, notion of strengths and weaknesses. Explanation of and responsibility for choices made.

Assessment and grading

If one of the three main focus areas of the final exam project is weak, it may lead to failure, even if the project is strong in the two other areas.

The grade is based on the entire project (both the journalistic product, the reflection report, and the lists of sources and literature).

The exam project is assessed following an open oral examination under the supervision of an external professional. The final mark is expressed in relevant grading systems (European, Dutch, Danish).

Group Projects

Two students may choose to produce their exam project together provided that each student's contribution is clear. Exceptions for different group sizes and exam projects are possible, based on a project proposal and upon separate approval.

Deadlines, format, platforms, and other submission details:

- The format and the choice of medium are open, and are discussed with the responsible teacher before the registration.
- Projects reflecting the EitW programme's multimedia approach are welcome but not mandatory. This includes projects aimed for online or mobile platforms.
- Students may use the school's equipment, upon availability. Similarly, students can obtain technical assistance and advice for problem solving as available.
- Quantitative requirements:
 - The journalistic product will reflect the equivalent of a written project of 25,000-40,000 characters with spaces per student (45,000-75,000 characters total if two students work together). It is normally divided in several items.
 - If TV is the medium: 20-25 minutes for one student, 25-30 minutes for two students.
 - Radio: 25-35 minutes for one student, 40-50 minutes for two students.
 - Mixed products and web-based products are calculated individually but will respect and reflect the above limits.
 - Reflection report: 15,000-40,000 characters with spaces (same for one or two students). The report follows guidelines specified in an assignment guide.
 - The lists of sources/literature: No quantitative limitations. The lists follow specifications in an assignment guide.

An assignment guide distributed by the start of the exam project period will contain details about procedures, counselling, equipment availability, registration, formats, deadlines, etc.

Dutch students must follow HU requirements:

- The format and topic must be agreed with the HU programme coordinator.
- All work must be uploaded on the digital graduation portfolio of the School of Journalism
- The oral exam is with two Utrecht examiners and one external expert, the examiners establish the grading, the expert has an advisory role

Rewrite:

Students who fail the final exam project can do a rewrite. The deadline will be within two months after the oral exams, and the rewrite is a new project on a new topic. The student must contact the Study Office and the responsible teacher beforehand.

Dutch students are allowed to conduct this 2nd attempt in Utrecht, upon acceptance from both institutions. In Utrecht the rewrite and oral examination must be completed before 1 September in order to graduate in time for the BA diploma.

Non-Danish/Dutch students may be allowed to correct a failed assignment, in order to obtain their EitW diploma. Danish students follow Danish exam regulations.

Honours Assessment

Students who have successfully participated in the honours programme during EitW can apply for the honours certificate. Registration for the final assessment is required.

To qualify, the student will demonstrate in his/her final exam project that she/he can perform on honours level, and meet higher standards for production and reflection. The student will describe all his honours achievements in a separate written submission (essay). The essay should argue, on the basis of honours competencies and examples why you have acquired the honours level (i.e. starting excellent professional). You will present your performances during the EitW year to a committee of honours lecturers and field experts. Supported by the honours portfolio, this proves that the student can explain and defend visions and choices in a coherent, convincing and autonomous manner, and that the student can liaise with other media practitioners in a constructive and professional manner.

Criteria for honours level in the final exam project

- The project as a whole forms a coherent total on a European issue or topic, in the broader scope of Europe in the World. (international perspective)
- The issues addressed have a high level of complexity. The candidate shows to work autonomously and with a high level of self-direction. (reflective practitioner, professional drive).
- The issues are transferred to an above-regional level, dealing with different political, economic or cultural angles, concerning multiple stakeholders. (reflective practitioner, international perspective)
- The productions are ready for publication on relevant platforms. The candidate can present proof of possible publication, and sees different opportunities for sharing and developing. (innovation and dissemination, reflective practitioner)
- The candidate works in a proactive manner, shows initiative, inspires and stimulates others as part of a team, and reflects on these issues. This is shown in the exam project and throughout the programme. (leadership qualities)
- The reflection report and oral exam shows that the student has a clear vision on the profession and the current developments and how he/she can contribute to the future development of the profession (professional drive, reflective practitioner, innovation and dissemination)

Students who fail the honours level will not acquire the Honours certificate but will gain a Star certificate for their honours achievements during the EitW programme. They still earn their Europe in the World certificate which deals with the bachelor level.

GUEST LECTURES

EitW students will be invited to lectures offered by international guest lecturers coming to the Danish School of Media and Journalism, and to Aarhus University. Some of these lectures may be included in the Euroviews and World Politics courses.

INTERNSHIPS

The Europe in the World programme does not include internships. We realise, however, that internships are important for the education of journalists. The staff of the programme will help by discussing students' possibilities of internships, and providing letters of recommendation. The initiative and the responsibility for the realization of an internship rest with the student.

In Denmark only few media outlets are in English. Students may sell their articles to the Copenhagen Post. There is a possibility to work with the Aarhus University-based news site <http://www.jutlandstation.dk> during the period in Aarhus, and to work with the school's student run media outlets (print magazine, radio station, broadcast TV).

As part of the honours programme it is possible for Dutch students to do an extra two months internship through the regular internship programme. This internship starts after the graduation and should be finalized before 1 September, the official graduation date for the Dutch BA Journalism.

ALUMNI

A unique possibility to stay in touch with your former international classmates is to sign up for the LinkedIn alumni site on:

http://www.linkedin.com/groups?home=&qid=2055813&trk=anet_ug_hm .

There is also an EitW Facebook group for alumni:

<https://www.facebook.com/groups/212376892219429/>

PRACTICAL INFORMATION UTRECHT

Faculty opening hours

Monday-Thursday:	07:00-22.00
Friday:	07.00-19.00
During school holidays:	07:00-17.00
National holidays:	closed

During the weekend and/or after school hours, we advise you to go to the University library at the Uithof, Heidelberglaan 3. More information is available at www.library.uu.nl.

Email

Together with your HU account, you also receive a HU student email address: firstname.familyname@student.hu.nl. You can access your email from any location via webmail.hu.nl with your login account and password. Do check this email address regularly or forward it to your private email address!

Room number

Lessons are scheduled in several buildings on campus, the first letter-number combination indicating which building, the second number the floor and room. Our building is on the Heidelberglaan 15. There are no designated offices for lecturers but there is a staff room on the second floor (Institute for Media square). But lecturers can work anywhere, so commutation via email or mobile phone works best. Also for students there are a lot of small project rooms and other facilities to study or work together in groups. You can make room reservations in the system if you need a special space, or you can sit down in the open Institute square.

Personal guidance

Carien Touwen is the coordinator of the programme. Barbara Geers is the project-assistant and responsible for a lot of the administrative and logistic matters. Carien Touwen and Elvira van Noort are in charge of the honours programme, which also offers personal coaching. If required we also have a school psychologist. For practical issues such as housing, visa, funding, please contact the International Office.

Payments

The only way to pay within the school is with a chip card. You need it to pay for lunch at the restaurant, for using printers and photocopiers. Dutch debit cards have a chip, but mostly students need to buy separate chip cards. Prepaid chip cards are for sale at the University library, Heidelberglaan 3 on campus (Uithof).

The international office also assists students with a temporary Dutch bank account, a chip is included in your bank card. This is recommended, especially if you don't have a European debit card, as most supermarkets -and a number of other shops and cafés/bars- don't accept credit cards.

Photocopiers, printers, fax

You can make photocopies and prints, not free of charge, with your student card.

Books

Required literature can be ordered and bought online at www.Bol.com or Amazon (if you order from home before departure to NL). Bol.com is the largest online book supplier in the Netherlands and will deliver to your student home. International books often take up to a week to deliver. There is a book store in town (Stadhuisbrug) and they can also order for you, they won't have specific study books in stock, only more general ones.

Phone

You can buy phone cards in any supermarket or post office. We strongly suggest you bring your own cell phone and buy a Dutch SIM-card and a prepaid card upon arrival. The SIM-card costs about 15 Euro but you will receive the same amount back in the prepaid card. Your Dutch SIM-card works in the whole off the EU and your credit is valid for the same rate. In 'international phone shops' in the multi-cultural neighbourhoods such as Lombok you can also buy cheap-rate cards for international calls using a code.

Computers

In school students can use Apple and other computers. Both are available in flex workspaces, all computers have access to the internet. Computers are available during opening hours of the school (outside opening hours go to the University library, Heidelberglaan 3). You may work on each available computer except when the class room is reserved for lessons. There are many student workspaces available where you can work without reservation. Make sure to have a network card installed on your laptop, there is Eduroam wifi all over campus.

AV equipment

We have our own equipment store on the first floor, opening hours are on the door. With your student card you can borrow camera's, tripods, radio equipment a.s.o. At reception other things can be borrowed, such as presentation materials. If necessary, ask lecturers for assistance.

Library

Our faculty has a wide variety of foreign newspapers, magazines and books. The library (or mediatheek) of all other faculties from the Hogeschool Utrecht as well as the library from the University of Utrecht is at your disposal. You can order their books through our faculty library or online. You will be issued a library card the first time you want to take out books. The complete catalogue can be found online: <http://www.library.hu.nl/>
Website of the University of Utrecht library: <http://www.library.uu.nl>

Mail boxes

All staff members and students have individual mail boxes/folders on the ground floor, near the entrance. Students can contact lecturers via their mailbox or email address (firstname.surname@hu.nl).

Fieldtrips

For fieldtrips you often need public transport. Apart from a bike this is the best option for transport in the Netherlands in general. An OV-chip card is used on all busses and trains. On occasion you can also buy a one-way ticket, but this is way more expensive. You can buy an OV-chip card at any bus or train station and repeatedly upload money from your credit or debit card onto it. For international trips you can order train tickets at the international desk at the central station or online. Sometimes long distance buses offer cheaper rates.

LIVING IN UTRECHT

Utrecht combines [a rich past with a dynamic present](#). The city, with its central location in the heart of the Netherlands, is known for its Dom church and Tower, museums and especially for its romantic canals. Thanks to its central position, Utrecht is one of the most important cities in the Netherlands. Here, all rail, road and water transport systems come together. Utrecht houses over 350,000 inhabitants and is the 4th largest city in the Netherlands. It is the largest student city with both an academic and applied sciences university. Since Utrecht has a population of approximately 45,000 students, there are many cafés, restaurants, shops and sports facilities at low budget prices.

Utrecht Science Park (De Uithof campus)

Most of the faculty buildings of both academic and applied sciences universities are located on the campus grounds of De Uithof, recently also referred to as the Science Park. Bus lines 11 and 12 directly go from central station to campus, but it is more convenient to take a bike. On campus there is also student accommodation, some shops and restaurants, the academic hospital, the university library, an academic book shop, sports facilities and the botanic garden. Nearby lies the nature reserve Amelisweerd, a popular lunch break area for academics and students and one of the major green areas of the city of Utrecht.

Sports facilities

Sports facilities are open to all students at the *Sport Centre Olympus*. The centre has tennis courts, playing fields, squash courts, a fitness room and three sport halls where you can follow a course from fencing and tai ki ken po to salsa and street dance. Of course, Utrecht has many more sports facilities in town (soccer, swimming, ice-skating, bowling, sailing and several fitness centres and saunas). Amelisweerd and several parks in the city centre have good options for jogging. There is plenty of water to be found around Utrecht. There are two lakes to the north-west of the city, the *Loosdrechtse plassen* and *Maarsseveense plassen* and one in the new western suburb Leidsche Rijn: *Haarijnse Plas*, where you can swim and get a tan in summer or do some sailing and windsurfing. A nice place to hang out is SOIA (the city beach on the west side of town on the way to Leidsche Rijn). To explore Utrecht from a different view, rent a canoe or water bike, either in town or close to the Uithof, near the swimming pool.

Cultural activities

De Uitwijk is the social-cultural platform of the Utrecht University. Its aim is to make life for students as pleasant as possible. It is a meeting place for students and staff where you can play games, read magazines or watch television. They offer courses in English like photography, drawing, yoga and almost every week day at 18:00 they show movies free of charge. *Parnassos* is the International and Cultural Centre. They offer a number of music, theatre and dance courses for students at very reasonable prices.

As Utrecht inhabits a fair amount of international students there are a number of international students organisations such as: the Dutch United Nations Student Organisation (SIB in Dutch), the European students network AEGEE has a very active group in Utrecht and the European Geography Association for students and young geographers, EGEA has its headquarters in Utrecht. They often organize activities (seminars, excursions, debates) for a broader public than members only.

Utrecht has the second highest number of cultural events in the Netherlands, after Amsterdam. Every first Sunday the city is the arena for a variety of cultural events connected to various themes. There are many cinemas in Utrecht showing movies in the original language with Dutch subtitles. Utrecht also hosts three art-house theatres. Several special film festivals such as the Latin American Film festival and Campus Doc (the School of Journalism documentary festival) are held in these venues.

Erasmus Student Network

The School is a member of the Erasmus Student Network (ESN). Their bi-monthly magazine will be distributed in your mail folder. ESN organizes a range of activities, parties and sight-seeing trips for international students. They have a weekly gathering at Mick O' Connells bar where you can meet other students. You can find more about their activities at their website.

Dutch courses

Learn online and acquire a beginner's or intermediate knowledge of Dutch. If you prefer a more intensive, effective, but more expensive language courses you can find possibilities in the 'Welcome to Utrecht' guide. There is, for example, the James Boswell Institute, a subdivision of the Utrecht University. The International Office also assists with Dutch language courses.

PRACTICAL INFORMATION AARHUS

Student Handbook

Please also see the Student Handbook on www.dmjx.dk/international for more details.

Personal guidance

Asbjørn Slot Jørgensen and Inger Munk are in charge of the Europe in the World programme. Anna Nejrup will assist in practical (including housing) and personal matters. Their office numbers are 613, 404 and 417 resp.

Phone

We expect that you have a mobile phone, and that you buy credits for your phone upon arrival. For long distance calls, we advise students to buy global cards/other cards or use Skype.

Photocopiers and printers

All students receive a number of free prints/copies by the start of the semester. Additional print/copy credits can be purchased.

Computers and e-mail:

Students are encouraged to bring their own computer, and can use the school's free wi-fi. You will have access to the school's computers for production purposes.

Students are granted an e-mail address at the school. This e-mail address is needed in order to check emails from lecturers and administration, to make prints, to work on the school computers, to use the wifi, and to access course material and other online resources.

Students are expected to check their school email on a daily basis.

This email account is closed one month after the courses have ended.

Online classroom

The school uses a Moodle-based intranet (virtual classroom) for study related material and communication.

For online publishing purposes, the school's WordPress-based Mediajungle-sites are used. Most productions are published on the www, some in collaboration with external partners.

Access to DMJX evenings and weekends

If you want to work late or during weekends at DMJX you need an access card. Each department requires a separate card (printed media, tv, radio departments). A 200 DKK deposit is required.

Library

The DMJX library is at your disposal. There are computers specially set up for international wire services and databases. The Danish State library at the Aarhus University is open for use if you have a social security number (CPR number). Books from the State Library and other libraries can also be ordered through the DMJX library.

Cameras for photo and video; sound recorders

Students can borrow video cameras and sound recorders at the school for assignments upon availability.

Students are advised to bring their own photo cameras (tourist camera or smartphone is usually sufficient).

Mailbox

Regular letters, telefaxes etc. will be delivered to the school's information desk.

LIVING IN AARHUS

With a population of about 320,000 inhabitants, Aarhus is the second largest city in Denmark. It has a lot to offer journalism students.

Aarhus was founded around the year of 900, at the time of the Vikings. Today, Aarhus is a thriving business and commercial sector as well as many schools and educational institutions located in the area. Thus, the city hosts more than 42,000 students of higher education, making Aarhus a young and vibrant city.

Aarhus combines a country setting with the advantages of city living. Being situated right on the waterfront, you are never far from sandy beaches and refreshing green woods. In addition, Aarhus offers all the usual city comforts, such as restaurants, cafés, parks and gardens, theatres, art museums and galleries, shopping centres, and night life. It has also a variety of offers for all levels of sports enthusiasts. Foreign films are subtitled and cultural events take place all year round.

Information sites

- See <http://www.denmark.dk/en> for a general information about Denmark.
- See <http://www.kl.dk/English/> about the Danish Local Government System
- See <http://www.aarhus.dk/da/omkommunen/english.aspx> and <https://businessregionaarhus.com> for general information about Aarhus.

Transportation in Aarhus

The transportation within Aarhus depends on where your student room is situated.

The bus system in Aarhus is very efficient and the busses leave often. Several bus lines and the light rail tram have stops right next to DMJX.

Bus timetables and ticket sale is found on Midttrafik's webpage: <https://www.midttrafik.dk/in-english.aspx>

Tickets are sold on the bus, online or via an app. Monthly bus passes can be obtained online or from Midttrafik Customer Service at Aarhus Bus Station on Fredensgade 45.

Bicycles

It is possible to find second-hand bikes for sale at flea markets or in the online classifieds such as dba.dk or guloggratis.dk.

You can also use the public city bikes, available from stands all over town (only during summer); they only require a 20 DKK deposit. Or you can use the commuter bikes for a low rental cost, see <http://cibi.dk>.

Student housing in Aarhus

More information about housing will be given in October/November.

Feel free to find your own housing before you arrive.

However, be aware that it is difficult to find housing for students in Aarhus. The school cooperates with the Municipality Housing office and can offer you a room from February 1 until June 30 (only six months periods available). Students will be housed in student accommodation at various places in and near Aarhus. The rooms are furnished but you should provide your own bedding (duvets/blankets, pillows, covers etc.). In the housing papers it will be specified what you have to bring.

Danish language

Courses are offered by lærdansk (www.laerdansk.dk).

Other options are online courses like www.speakdanish.dk

Social life: Friday bar

Students at the Danish School of Media and Journalism have their own bar. It is situated in the school basement and is open every Friday from 14.15 until 24.00.

The bar is managed by student volunteers. In the beginning of each semester new volunteers are looked for. Approximately ten are required and international students are welcome.

Social life: Other activities

Naturally, most of the student run activities at the school are in Danish, such as debates, and the students' council. However, international activities are welcomed, on students' initiative. There is a student soccer team as well.

Social life: School parties

The student union at the Danish School of Media and Journalism arranges two big school parties every semester. They are held in the school canteen and are very popular.

Stuenterhus Aarhus (student house)

During the first week of introduction, international students get introduced to Stuenterhus Aarhus. Stuenterhus Aarhus is the meeting place for foreign students and Danes. It is a place where you can relax when you are not studying or working. It has years of experience in organising social activities, advising and providing practical information to foreigners living in Denmark. It is a non-profit, non-religious and non-political organisation. The aim of the student house is to promote international understanding by providing a relaxed atmosphere for social and cultural interaction and exchange. See more on www.stuenterhusaarhus.dk

COURSE FEE AND ADMISSION

The Europe in the World programme is open to all last year BA journalism students and young professional journalists. The course fee is 3.000 euro for non-exchange students for the Utrecht part and 4.400 euro for non-exchange students for the Aarhus part. Exchange students enter the programme free of charge and have priority to admission. There is a possibility to apply for a Danish stipend to cover the fee for the Danish part for non-European participants from non-partner institutions.

The course fee must be paid in advance to the financial department of the respective schools of journalism. Reimbursement of the fee, if leaving the course, is not possible after one month after the start of the programme. In case of leaving within one month, the fee minus 10% will be reimbursed.

BUDGET

The following budget is an estimate of average costs and is subject to changes, many depend on your personal circumstances. All figures are in Euro.

1 Euro \approx 7,5 DKK

Course fee:	Only to be paid by non-exchange students	3.000 (Utrecht) + 4.400 (Aarhus)
Travel expenses:	Ticket home-Netherlands vice versa	depends on country
	Travel Utrecht-Aarhus vice versa	150
Other expenses:	Insurance through Lippmann Group 10 months Insurance is compulsory. Lippmann optional	360
	Registration fee SSH Utrecht (housing)	175
	Rent 5 months Utrecht	\pm 2200
	Living expenses 5 months Utrecht	\pm 2000
	Field trips Utrecht period	200
	Books Utrecht	150
	Rent 5 months Aarhus	\pm 2400
	Living expenses 5 months Aarhus	\pm 2300
	Travel period Euroviews (depends on dest.)	\pm 900
	Study tour Copenhagen	\pm 150
	Books Aarhus	50
Visa Netherlands:	Non-EU students should check if they need an entry visa and/or residence permit. Check www.nuffic.nl/immigration or www.ind.nl which procedures apply to your personal circumstances.	\pm 430
Visa Denmark:	Everyone needs to apply for a residence permit, applications for non-EU students are made while in the Netherlands. EU students apply after arrival in Denmark.	255
