Danish School of Media and Journalism

Corporate Communication

Course description

Spring semester 2024

Course: Execution of CSR and sustainability communication

Number of ECTS Credits: 10 ECTS

Aims:

In the last course of the semester, you will work in practice with a case related to communication of CSR and sustainability for which you will need to draw on your knowledge acquired in the first two courses of the semester. In other words, you get the opportunity to apply your newly attained knowledge, skills and competences within the field in practice on a real-life case for which you will get feedback from both your professors and the case company. The course also looks at how organizations can communicate responsibly, and how message strategies, media choices and creative strategies both contribute to the overall CSR strategy and to the communication of it. The final project gives you the opportunity to define a communication brief, develop a creative idea and product, and determine a message and media strategy.

Pedagogical and didactic approaches:

This last course of the semester has the purpose of finally introducing the students to the operational level of CSR-communication. The course provides the students with the knowledge, skills and competences required to communicate responsibility on a practical level, and to do so in a responsible manner. Focus is placed on the considerations, possibilities, and challenges, related to practical CSR-communication, and how they influence the communication process, from; identifying a relevant problem, and in relation to that developing relevant and strong insights, to crafting a creative brief and finally executing and evaluating the effect of the communication through relevant and responsible KPIs.

Side 1 / 4

The course introduces a real-life case, to which lectures, class exercises, group work, student presentations and assignments are all continuously related. By giving students the opportunity to immediately *operationalize their acquired knowledge to a real-life case*, the course enables students to actively practice and progressively develop their communicative skills, in collaboration with the case, professors and co-students, as well as gradually develop an overall understanding and first-hand experience of the process of operationalizing strategic CSR-communication.

Working methods:

Students are expected to prepare for classes (e.g. read literature individually, as well as participate in and contribute to the ongoing group work outside of classes, i.e. discuss theories and solutions in relation to the overall case, perform research, develop and test communicative and creative solutions, prepare presentations etc.) and to participate actively in classes. The teaching and the content of this course thus requires a high degree of independent as well as group work from the students as well as high level of participation.

Learning outcomes:

The students will obtain the following during the course:

Knowledge about:

- Trends and current developments within practical CSR communication, especially message strategies, creative strategies, and choice and use of media
- Causes of sceptism towards CSR and how communication can counter distrust
- Different strategies to creating communicative credibility and trust
- Characteristics and qualities of different media, in relation to communicating responsibility
- The process of developing a creative brief, and the sub-elements of that process
- How practical, operational CSR-communication, can connect to and influence the overall corporate strategy and brand

Skills in:

- Developing a creative brief, i.e.:
 - Identifying and qualifying creative insights
 - Identifying and qualifying a target audience
 - Developing and qualifying a creative concept
 - Developing responsible message strategies
 - Making responsible media choices and combining media in an effective as well as responsible cross-media strategy
 - Identifying relevant and responsible KPIs for the communication effort
- Crafting and executing creative and responsible communication
- Presenting the creative brief via both the brief-, and pitch-format

Side 2 / 4

Competences in:

- Practical communication of corporate social responsibility
- Execution of complex communication strategies
- Critical reflection and independent application of theories and methods within the field of strategic CSR-communication

Side 3 / 4

Prerequisites for taking the exam:

Fulfilling the requirements mentioned here is a prerequisite for the students to take the exam. Failing to fulfill requirements counts as a used examination attempt.

Compulsory attendance: All scheduled classes are compulsory.

Compulsory participation:

Assignments: All obligatory assignments are compulsory and must be submitted in time and approved.

Group work: Participation in assigned group work is also compulsory.

Remediation

The possibility for remediation only applies in cases of lawful absence.

Substitute assignments: Scheduled classes can be substituted by one or more written assignments if the lecturer finds it necessary. This is always based on specific and individual assessment. If the student has more than 30% absence in scheduled classes, the student must resit the course.

Exam/Grading:

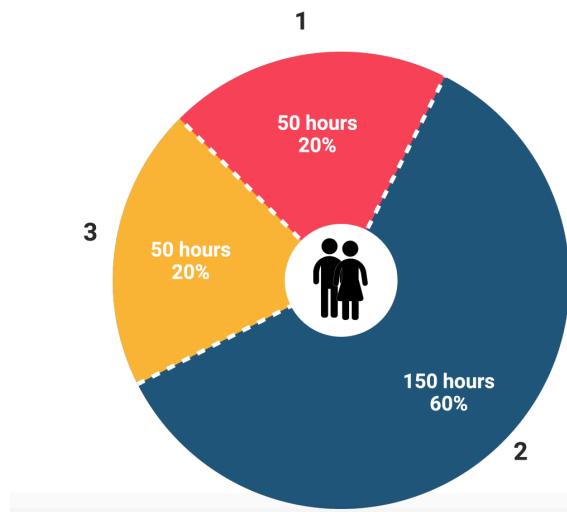

The course is assessed through an oral group exam, using the Danish 7-point grading scale (internal assessment). The exam consists of a group presentation, followed by questions and dialogue. The groups for the exam are the same as the study groups during the course, which are composed by the institution. The duration of the exam is 15 minutes per student, including grading and feedback, with a minimum of 25 minutes, and a maximum of 75 minutes per group. The student receives individual evaluation.

Study Activity Model:

The Study Activity Model

Execution of CSR and sustainability communication

250 hours in total
10 ECTS points
6 weeks

Category 1

The lecturer has primary responsibility for the study activities, and the students have co-responsibility through their preparation and participation. Participation by students and one or more lecturers.

lectures, workshops, in-class group-work, case-presentations etc.

Category 2

The lecturer has primary responsibility for defining the learning activities, and the students have primary responsibility for taking an active part in the planned study activities. Participation by students only.

group work i.e.: research, problem solving, home assignments, discussions, preparations of presentations

Side 4 / 4

Category 3

Students have primary responsibility for the study activities, and the lecturer has co-responsibility for ensuring appropriate settings for the activities. Participation by students only.

readings and individual research

Category 4

Students have primary responsibility for the learning activities, and the lecturer has co-responsibility for ensuring appropriate settings for the activities. Participation by students and one or more lecturers.
